Windows event review

Application log | last 24 hours | levels 1, 2, 3 | limit 100 | collected 2026-10-11 06:30:00 +02:00

4 retained / 0 critical / 2 errors / 2 warnings

This bounded snapshot supports investigation. Counts do not identify a root cause or describe the entire environment.

Where to start looking

Provider	Events
Demo.Backup	2
Demo.Service	1
Demo.Storage	1

Investigation handoff

- Open EventRegister.xlsx and read the full messages for the busiest providers.
- Compare the timestamps with the failed job, service change or user report.
- Record the investigation owner, next action and follow-up time in this document.
